

a project of **Genesee RIVERWATCH™**

Professional Development Workshop

Is the Genesee River Healthy?

Join us to learn about leading your students through an inquiry based investigation into the measurements scientists use to determine the health of the Genesee River. We will compare the results of water tests on two different bodies of water and consider what might be affecting the water quality.

Tues, May 14th 4:00 - 6:00

Wegman Lodge - Seneca Park

This two hour professional development opportunity is designed for 6-12 science teachers, coaches and administrators who would like to join a community of teachers educating students about the Genesee River.

Objectives:

1. Discuss the health of the river with guided protocols
2. Sample and analyze water for indicators of pollution
3. Consider factors that affect water quality
4. Understand actions that can protect and improve water quality
